

INDEX

- 2,2-diphenyl-1-picrylhydrazyl,
19
- algae, 53
 - brown, 53–55
- analysis of variance, 73
- andrographis paniculata*, 5, 83
- andrographolide, 88
- anticancer, 28
- antidiabetic, 28
- antiinflammatory, 54
- antioxidant, 17
- beehives, 15
- bioactive compounds, 1
- biotechnology, 10
- carbon dioxide, 2, 32–33
 - high-pressure, 35
- cavitation, 58
- chromatography, 96
- diffusion rate, 96
- DPPH *See* 2,2-diphenyl-1-picrylhydrazyl
- dissociation constant, 44
- duration, 2
- extraction, 1, 31
 - efficiency, 62
 - green, 3
 - liquid-liquid, 90, 92
 - microwave assisted, 2, 62–63, 88–89
 - modern, 8
 - pressurized liquid, 7
 - solvent-free microwave, 5, 69
 - soxhlet, 2
 - subcritical water, 2, 44, 46
 - supercritical carbon dioxide, 3, 19, 21
 - supercritical fluid, 2–3, 31–32
 - traditional, 6
 - ultrasound assisted, 2, 58–59
- flavonoid, 4, 19, 75
- fractionation, 98
- fucoidan, 56
- hempedu bumi, 83–84
- herbs, 1

- high pressure, 34
- laminarin, 56
- liquid chromatography and mass spectrometry, 16
- LLE *See* liquid-liquid extraction
- maceration, 7, 68
- MAE *See* microwave assisted extraction
- mahogany seed oil, 44
- mass transfer, 62
- method
 - colorimetric, 71
 - spectrophotometric, 16
- microwave power, 75
- moisture content, 69
- natural products, 1
- nephelium lappaceum, 67
- optimization, 2
- partition coefficient, 5, 47
- PLE *See* pressurized liquid extraction
- phenolics, 28
 - contents, 71
- phytochemicals, 88
- piper betle*, 4, 25–27
 - health benefit, 30
 - phytochemical composition, 29
- polyphenols, 4
- polysaccharides, 55
- propolis, 3, 15–17
 - color, 22
 - extracts, 17
 - raw, 18
- rambutan, 5, 68
- reflux, 7
- scavenging ability, 71
- SCCO₂ *See* supercritical carbon dioxide extraction
- SFE *See* supercritical fluid extraction
- SFME *See* solven-free microwave
- solvent, 2
- SWE *See* subcritical water extraction
- swietenia macrophylla, 43
- temperature, 2
- terpenoids, 85
- thermodynamic model, 44–45
- UAE *See* ultrasound assisted extraction
