

INDEX

- adsorbent, 2, 8, 12, 15, 113, 171–91
- anaerobic digestion/
 - degradation, 5, 10–11, 17–18, 32, 41–46, 51, 63, 152, 175
- biochemical oxygen demand, 5, 10–11, 29, 32–34, 40, 44–45, 52, 60–61, 83–86, 127, 153, 174–75, 193–95
- biofertilizer, 194
- biofuel, 7
- biogas, 167
- biohydrogen, 5, 22, 50, 171, 174
- biomass, 50, 71, 73, 193
- biomethane, 5
- BOD. *See* biochemical oxygen demand
- carbonization, 186–88
- chemical activation, 185–86
- chemical oxygen demand, 5, 9–10, 17, 31, 36, 42, 47, 55–56, 62–69, 79, 83–90, 107, 110–16, 133, 136, 141, 143, 148–49, 153, 155, 157, 160–61, 164, 182–83
- circular economy, 69
- coagulation-flocculation, 12, 54–55, 69–70
- COD. *See* chemical oxygen demand
- concentration polarization, 80, 116
- conventional ponding, 42
- electrocoagulation, 63–64, 68, 71
- electron transfer, 137–41, 157, 162–63, 171, 173
- energy resource, 185, 192
- environmental impact, 3, 7, 10, 14, 16, 19, 37, 49, 165
- Environmental Quality Act, 35, 37, 42
- EQA. *See* Environmental Quality Act
- feedstock, 9, 144, 149, 155
- flocculant, 23, 58, 62, 70
- flotation, 2, 12, 54, 56, 69, 71
- growth medium, 183, 185–87

- hollow fibre membrane, 84–85, 87
- membrane distillation, 2, 23, 102, 105, 123–26
- membrane fouling, 78–83, 87, 88, 96, 112, 116–117, 121, 134, 154–155, 174
- microbial fuel cell, 2, 10, 23, 25, 136, 138, 143, 150, 166–75
- nutrient recovery, 183, 187
- PEM. *See* proton exchange membrane
- permeate flux, 79, 80, 83, 86, 87, 90, 103–104, 107, 109, 112, 115, 117
- photocatalytic, 16, 169
- physical activation, 185
- POME sludge, 86, 187–188, 190
- power density, 136, 140, 143, 148–149, 157–159, 161, 164
- proton exchange membrane, 25, 148, 171–172, 175
- recycling, 20, 40, 66, 134, 181
- reuse, 10, 12–13, 15–17, 18, 65, 127
- tubular membrane, 76
- total nitrogen, 4, 32, 36
- ultrafiltration membrane, 24, 38, 52, 76, 81, 92, 95–96
- waste management, 3, 183
- zero discharge, 1, 10, 13, 18, 20, 66
