

INDEX

- absorption, 80–81, 95, 121
- acid, 31–33, 36
- acrylic
 - fibres, 99
 - purity, 100
 - foam tape
 - sulphur content, 111
 - polymers, 99
 - thermoplastics, 99
- ash, 101
 - content, 109
 - inorganic compound, 101
- Aspen Plus, 13, 23–27, 33–34, 38
 - model, 25
 - simulation, 26
- asphyxiant gases, 98
- bioenergy, 19
- bioethanol, 20–28, 31–37
 - enhanced combustion, 22
 - processes from EFB, 22
 - yield, 31
- biofuels, 13, 17–18, 20
- biomass, 17–21, 24–26, 34, 37–39
 - lignocellulosic, 18, 34
- bioreactor, 35
- carbon dioxide *see* CO₂
- cellulose, 20, 23, 26, 28, 31–33, 38
- chemical formula
 - acrylic products, 112
 - PMMA, 112
- chemical
 - injection odorises, 68
 - vapourisation odorises, 68
- CO₂, 29, 40–41, 43, 45, 106, 110–11, 120, 122
- combustion, 22, 98, 105–06, 108–09, 110–12, 116, 119
 - efficiency, 21
 - complete, 110
- compounds, 68, 110, 116, 119
 - biomass, 24
 - inhibitory, 31
 - phenolic, 24
 - soluble, 25
 - surrogate, 34
- concentration

mercaptan, 69, 70, 74, 78,
83
odorant, 68, 83
crystalline silica, 122

distillation, 24, 28, 31, 33

EFB, 13, 18, 21, 23, 26–27, 29,
31–33, 35

elements, 100, 106, 112, 118–
19, 123

emission, 40–43, 52, 100, 112
carbon dioxide, 50

pollutants compounds, 43

empty fruit bunch *see* EFB

excess, 38, 110

feedstock, 18, 32–33, 35, 37

fermentation, 13, 23, 26–27,
31, 33–35

fire toxicity, 98

fissile materials, 54

formation, 33, 100–11, 116,
118–19

GHG, 22, 40–42, 46

green travel tracker, 49

greenhouse gas

source, 9

greenhouse gas emissions

reduce *see* GHG

H₂O, 29, 106, 110–11

hemicellulose, 20, 26, 28, 32

humans, 100, 112

hybrid, 43

hydrolysis, 13, 20, 23, 26–28,
31–34, 36, 39

incomplete combustion, 120

inhibitor, 33

formation, 31

irritant, 98

kinetic, 27

layers, 118

life cycle assessment, 11

lignin, 20, 23–24, 26, 32

longer pipelines, 80

metaheuristics, 55

microbial, 31, 33–34

model, 24, 27, 31, 34, 69–70

monoxide, 22

N₂O, 40, 42–43

nitrogen, 100, 105, 110–12

nitrous oxide *see* N₂O

non-random two liquid, 25

odorisation, 67

OPEFB high cellulose content,
21

oxygen, 100, 106, 110–12, 117

ozonolysis, 35

- particle swarm optimisation *see* PSO
- particulate matter
 - human health, 101
- PMMA, 101
- polymethyl methacrylate *see* PMMA
- pretreatment, 13, 20, 23, 26, 28, 31–33, 39
- process flow diagram, 23
- product design, 11
- PSO method, 55, 57
- purpose, 119
- raw, 113
- reactors, 27
- renewable
 - electricity, 9
 - energy, 2, 4, 10–12, 33
- samples, 103–04, 106–08, 113
- silicon and aluminum
 - melting point, 118
- SO₂, 106, 111
- software, 23, 69–71, 106
- splitting of operators, 74
- sulphur oxide *see* SO₂
- sustainable energy, 2, 4, 9
 - advantages, 9
 - characteristics, 3
 - four pillars, 5, 7
- temperatures, 106, 108, 110, 116–19
- thermogravimetric, 105
- toxic gases, 98
- travel, 40–41
- water *see* H₂O
