

INDEX

- acid hydrolysis, 42, 51, 54, 55, 62, 69
- alkaline treatment, 31, 52, 61
- analytic hierarchy process, 143
- anisotropic, 96

- bamboo, 179–81
- boundary conditions, 169

- cellulose nanoparticles, *see* CNPs
- compatibiliser, 72
- composite laminate, 97
- Composite Laminate Theory, *see* CLT
- CLT, 12, 98
- composite material, 4, 95, 121
- compression moulding, 83–84
- concept selection, 2
- Crystallinity Index, 53
- CNPs, 5, 29
- concurrent engineering, 1, 9–12
- conceptual design, 1, 9, 14
- colloidal stability, 5, 50

- design criteria, 126, 154

- Design for Excellence, *see* DfX
- Design for Sustainability, *see* DfS
- Design of Experiment, *see* DoE
- DfS, 2
- DfX, 12
- DoE, 12, 101

- evaluation matrix, 163

- filament winding, 12
- Fourier transform infrared spectroscopy, *see* FTIR
- fracture toughness, 101
- freeze-drying, 26, 31, 51
- FTIR, 33, 34
- function block, 159
- functional decomposition, 134, 159

- graft copolymers, 73
- green materials, 4

- in-situ polymerisation, 81, 84
- injection moulding, 83–84
- inorganic fillers, 70
- isotropic, 96

lamina, 93

material selection, 8

MCDM, 17

mind map, 14

morphological chart, 15, 135,
160

multi criteria decision-making,
see MCDM

nanocellulose whiskers, *see*
NCW

nanocellulose, *see* NC

nanocrystalline cellulose, *see*
NCC

nanofabrillated cellulose, *see*
NFC

natural fibres, 5

NC, 67

NCC, 25, 49

NCW, 69

net score, 141

NFC, 25, 69

oil palm biomass, 25

oil palm empty fruit bunch, *see*
OPEFB

one-pot, 81

OPEFB, 28, 48

physical decomposition, 134

process designs, 10

product design specifications, 1,
163, 155

product designs, 8

products, 8

QFD, 14

quality function deployment, *see*
QFD

scoring matrix, 141

screening matrix, 140

solvent casting, 82

TEM, 33

TGA, 51

Theory of Inventive Problem
Solving, *see* TRIZ

thermal stability, 50, 51

thermogravimetric analysis, *see*
TGA

transmission electron

microscopy, *see* TEM

TRIZ, 16

VOC, 14

voice of customer, *see* VOC

X-ray Diffraction, *see* XRD

XRD, 55

zeta potential, 50, 54
